

**Second Paper Topic**  
**Philosophy 175**  
**Winter, 2017**

Your paper should be a little more than three pages in length. All claims about Kant's views must be documented using page references to the text (either page numbers in the translations or the marginal numbers). Be sure to give an account in your own words of all the relevant technical terminology from Kant.

The main text should be the *Critique of Pure Reason*. The best summary of the argument may be found in the section "On the Supreme Principle of All Synthetic Judgments" (A154/B193-A158/B197). You may also use the Analytic of Concepts if you see fit. See also the *Prolegomena*, §§21a-23, (pp. 43-45, Ak 4:304-306).

What was Kant's basic argument for the claim that synthetic *a priori* judgments bringing objects of experience under the categories apply to those objects?
